

Day 2

Operators & Classification

Arithmetic operators are mainly mathematical operations that are performed on numerical values :

Copy of Arithmetic Operator

Aa Operator

+

-

*

/

%

//

Assignment Operators

Assignment operators are used to assign values to variables:

Untitled

Aa Operator

=

+ =

- =

* =

/ =

% =

// =

** =

& =

| =

^ =

> > =

< < =

Comparison Operators

To compare any two variables we use comparison operators.

Untitled

Aa Operator

==

!=

>

<

>=

<=

Python Identity Operators

Identity operators are used for comparing the objects, not if they are equal, but if they are actually the same object, with the same memory location:

Untitled

Aa Operator

is

is not
